

SIMPLER

The **TIMES** concept promotes a holistic approach to patient well-being in **wound care** and contributes to identifying **barriers to healing** and guides the plan of care to remove them.

TISSUE

T

Assess
Is the tissue viable?

Action
Remove devitalised tissue

Outcome
Clean, viable wound bed. The wound bed is prepared for dressing application to prevent infection and biofilm formation.

✓
Flaminal® continuously debrides the wound

INFECTION

I

Assess
Are there signs of infection such as redness oedema, heat and pain?

Action
Disrupt bacterial bioburden and prevent recurrence

Outcome
Bacterial balance and reduced inflammation.
Pain reduction, reduced exudate levels and odour. The wound is on a healing trajectory

✓
Flaminal® offers antimicrobial protection & reduces bacteria released from a biofilm

MOISTURE

M

Assess
Is there a lack-of or an excess of exudate?

Action
Apply moisture-balancing management strategy with optimal dressing and change frequency

Outcome
Moisture balance ensuring wound is conducive to healing. Protease levels are balanced. Patient quality of life is improved

✓
Flaminal® keeps the wound moist

EDGE OF WOUND

E

Assess
Is there undermining, tunnelling and maceration?

Action
Identify and treat causative issues such as excess moisture and infection

Outcome
Advancing wound edges as migration of epithelial cells commence progressing to maturation and full wound closure

✓
Flaminal® is safe for skin & protects wound edges

SURROUNDING SKIN

S

Assess
Is there dry, flaky skin or signs of excoriation?

Action
Cleanse and apply emollient if dry or address moisture levels and protect from further damage if skin excoriated

Outcome
Viable skin. Maintaining good skin health and integrity overall reduces risk of breaks to the skin and infection

✓
Flaminal® does not damage surrounding skin

Simpler wound management, without compromise

For slightly to moderately exuding wounds

| | PACK SIZE | PIP CODE | NHS CAT NO. |
|--|---------------|----------|-------------|
| | 5 x 15g tubes | 324-2971 | ELG021 |
| | 1 x 50g tube | 344-9600 | ELG025 |
| | 500g tub | - | ELG029 |

For moderately to highly exuding wounds

| | PACK SIZE | PIP CODE | NHS CAT NO. |
|--|---------------|----------|-------------|
| | 5 x 15g tubes | 324-2963 | ELG022 |
| | 1 x 50g tube | 344-9592 | ELG023 |
| | 500g tub | - | ELG028 |
